DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: the specification contains blanks on pages 1 and 14 (for example).

Appropriate correction is required.

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Oath/Declaration

The application is objected to because of alterations which have not been initialed and/or dated as is required by 37 CFR 1.52(c). A properly executed oath or declaration which complies with 37 CFR 1.67(a) and identifies the application by application number and filing date is required.

Information Disclosure Statement

The information disclosure statements filed on 1-15-2002 and 1-22-2004 have been considered. An initialed copy is enclosed.

Election/Restrictions

Applicant's election of Group XVIII in the Paper filed on 6-8-2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 37-65 and 70-84 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim.

With regard to claim 66, said claim is indeed a linking claim and will be examined as such. Consequently, claims 66-69 are currently under examination.

Art Unit: 1645

Claim Objections

Claim 67 is objected to because of the following informalities: said claim recites limitations drawn to non-elected inventions. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 66-69 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 66 is rendered vague and indefinite by the use of the term “substantially pure”. It is unclear what is meant by said term since it is not explicitly disclosed in the specification. The only “definition” provided by the specification is with regard to the purity of antibodies (see page 14).

Claim 66 is rendered vague and indefinite by the use of the term “mediates”. It is unclear what is meant by said term since it is not explicitly defined in the specification. Does the claimed protein directly bind to host tissue or is it involved indirectly? As written, it is impossible to determine the metes and bounds of the claimed invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1645

Claims 66-69 are rejected under 35 U.S.C. 102(b) as being anticipated by Glee et al. (Colloids and Surfaces B: Biointerfaces, 1995, Vol. 5., pages 181-188 – IDS filed on 1-22-2004).

Glee et al. disclose a hydrophobic cell wall protein from *Candida albicans* with a molecular weight of about 38 kDa (see Figures 1-3 and page 186). While Glee et al. do not explicitly disclose all of the biological characteristics recited in the instant claims, the disclosed 38 kDa hydrophobic cell wall protein from *Candida albicans* is deemed, in absence of evidence to the contrary, to encompass the claimed protein.

Because the Office does not have the facilities for examining and comparing the applicant's product with the products of the prior art, the burden is on the applicant to show a novel or unobvious difference between the claimed products and the products of the prior art (e.g. that the products of the prior art do not possess the same material structural and functional characteristics of the claimed product). See *in re Best*, 562 F.2d 1252, 195 USPQ 430 (CCPA 1977).
